### Snake Creek Mines.

Snake creek canyon has been prospected for precious metals almost from the earliest days of mining in this state and long before the discovery of the great Ontario or the building of Park City. Some very rich ore has been taken out along the north slope of the canyon in many places, the Bonanza Flat has passed through several mining excitement on account of the discoveries that have been made there and claims on that flat are considered to be valuable workings. All miners agree that there must be large bodies of valuable ore in that mountain but no true fisher veins bearing paying values have as yet been discovered, on the Wasatch county slope, unless it be on the Bonanza Flat.

The most of the territory described above is located and much of it is patented and the properties beginning at the head of the canyon are as follows: The Mountain Lake Mining Company has about 40 patented claims extending from the Park City slope along the ridge at the head of Snake Creek and over into American Fork Canyon, covering a large tract of land in the head of the canyon. This company has recently purchased the stream out property in the head of Snake Creek consisting of about 30 patented claims. Next comes the Lions, Wide West, Heber City, Big Four, Balsam Grove, Dogskin, Roper, T. M. S.,

"There must be  
500 miners  
in Snake  
creek area"
